

ACTIVES & EXTRACTS

ACTIVES & EXTRACTS

» CITRUE BISABOLOL

Description:

INCI:
Bisabolol

Vegetal origin
approved by COSMOS

Features & Functions

CITRUE BISABOLOL is a 100% natural product, sustainably produced.

- Anti-acne
- Anti-microbial
- Soothing

» ActivGH Extract

Description:

INCI:
Aqua, Propanediol,
Glechoma Hederacea Extract

Vegetal origin

Features & Functions

ActivGH is an active herb extract (Ground Ivy) diluted in natural origin Propanediol.

- Skin lightening
- Soothing

» Activonol-HAP

Description:

INCI:
Hydroxyacetophenone

Features & Functions

Activonol-HAP is a multifunctional cosmetic ingredient with excellent synergistic anti-microbial effect combined with other preservatives. With good compatibility in formulations, it can be applied to a variety of formulations.

- Skin lightening
- Soothing
- Soothing

» Activonol-M

Description:

INCI:
Dipropylene Glycol, Hydroxyacetophenone,
Dipotassium Glycyrrhizinate, Capryl Glycol

Features & Functions

Activonol-M is an optimized combination of anti-microbial ingredients with a broad, balanced spectrum of effects against bacteria and fungi. It can be applied to facial mask sheets and wet-tissue formulations in wide temperature and pH range with excellent compatibility.

- Anti-microbial

» ActivNeo-PEP

Description:

INCI:
Aqua, Butylene Glycol, Cholesterol,
Alcohol Denat, Hydrogenated Lecithin,
1, 2 Hexanediol, Oligopeptide-5

Features & Functions

ActivNeo-PEP is a patented novel anti-ageing peptide. It increases collagen synthesis and KGF (keratinocyte growth factor) expression.

- Anti-ageing

» Sprout GF Complex

Description:

INCI:
Water, Propanediol, Brassica Campestris (Rapeseed) Sprout Extract, Brassica Oleracea Italica (Broccoli) Sprout Extract, Brassica Oleracea Gemmifera (Brussels Sprouts) Extract, Helianthus Annuus (Sunflower) Sprout Extract

Vegetal origin

Features & Functions

Sprouts have various nutrients, vitamins, plant hormones and enzymes which are released from seed during sprouting. Sprout GF Complex has multifunctional effects: It increases the proliferation of skin cells (i.e. fibroblasts and keratinocytes) and activates the growth factors (i.e. HGF, TGF- β).

- Anti-ageing
- Antioxidant
- Skin barrier strengthening

» Ubidecarenone (Coenzyme Q10)

Description:

INCI:
Ubiquinone

Vegetal origin

Features & Functions

Coenzyme Q10 is produced by fermentation of glucose (corn starch).

- Anti-ageing
- Antioxidant
